

### Fire and Water

Insur-Fi is partnering with property protection companies to provide sensors that insureds can install in their properties. These sensors detect and monitor water, temperature, and humidity at the property and provide real-time notifications if the detected values exceed preset thresholds. The sensors transmit this data via cellular connections avoiding most disruptions.

- Provide first notice of loss for insureds.
- Monitor temperature to help prevent burst pipes.
- Reduce water loss by 40%.

### Workplace Safety

Insur-Fi is partnering with workplace safety companies to provide video analytics AI. These engines sample video from existing video systems at customers' facilities and assess safety practices and workplace hazards to offer recommendations on how to reduce or eliminate risk and lower accident rates.

- Analyze footage from existing video cameras.
- Identify proprietary risk factors for more than 50 common behavioral and environmental hazards.
- Share insights and tools to keep workers safe.
- Protect personal information and personal identity.
- Offer a competitive workers' comp insurance quote.
- Up to 50% reduced injury rates.
- 50-99% reduction in behavioral and environmental hazards.
- 23% reduction in claims
- 20% lower Total Cost of Risk (TOR)

## **Building and Equipment Management Platform**

Insur-Fi has teamed up with industry leaders to offer customers access to building and equipment management technology. It empowers building owners/operators to:

- Connect to your end-insured.
- Manage critical facility assets.
- Increase equipment uptime and life spans.
- Recover faster from downtime.
- Streamline maintenance activities.
- Reduce costly reactive maintenance.
- Baseline building efficiency rating.
- Decrease energy and water consumption.
- Implement critical remote monitoring technologies.
- Short-cut supply chain issues.
- Request service at reduced costs through manufacturer authorized service providers.
- Develop a capital equipment plan.
- Take advantage of energy credits and rebates on new equipment purchases.
- Improve and analyze performance.
